

International 
Ion Chromatography
Symposium

17–19 September 2012 andel's Hotel, Berlin, Germany

24th International Ion Chromatography Symposium

Symposium Co-chairs:

Charles Lucy

University of Alberta, Canada

Andreas Seubert

University of Marburg, Germany

Abstract Submission Deadline:

June 20, 2012 for oral presentation consideration

August 1, 2012 for poster presentations

Student Travel Grant Application Deadline:

June 20, 2012

**Engage in these
important ion
analytical topics:**

Ion Analysis in Water Chemistry

Environmental Applications

IC of Organics and Biomolecules

Industrial Applications

IC Usage for Forensics and
Pharmaceuticals

Trends in Ion Chromatography and
the Young Scientists Session

Stationary Phase Development

New Detection Approaches and
Instrumentation

Ion Analysis and Mass
Spectrometry

For up to date information on this Symposium go to www.casss.org

CASSS
AN INTERNATIONAL SEPARATION SCIENCE SOCIETY
www.casss.org

BONUS

Monday, September 17, 2012 – 9:00 am – 4:00 pm

In addition, IC users will have the opportunity to attend user meetings hosted by the leading IC instrument developers – Metrohm AG and Thermo Scientific - in the same location. For more information, please visit www.casss.org.

24th International Ion Chromatography Symposium

Ions (and ionic interactions) are ruling the world. This statement is not only true for large bio-molecules but also for small and mid-sized ions. **IICS** is the only scientific symposium specifically orientated around the separation and analysis of ions primarily by ion chromatography, but also including capillary electrophoresis and other ion related analytical techniques from electrochemistry and spectroscopy.

IICS will provide an excellent overview on actual and upcoming analytical applications from various fields of ion analysis, combined with the latest fundamental developments around new columns, detectors and complete analytical systems. **IICS** will provide an excellent venue to share your application or your analytical problem related to ion analysis.

The **IICS** provides a venue for industrial, regulatory, government and academic scientists to meet, network and participate in exchanges of knowledge around ion separations and analysis for mutual education in and advancement of the use of separation techniques for ion analysis.

International
Ion Chromatography
Symposium

For More Information

For program updates, hotel and registration information, abstract submission and information on exhibiting and sponsoring, please visit the Symposium website frequently at www.casss.org

CASSS

5900 Hollis Street, Suite R3
Emeryville, CA 94608
Phone: 510-428-0740
Fax: 510-428-0741
www.casss.org

Why should you attend?

Attendees will:

- Gain greater insights into the fundamentals of ion chromatography and its competing alternatives
- Learn from existing and upcoming applications the potential of IC and related techniques to solve their own ion related problems
- Share applications of IC and related techniques to water, food, pharmaceuticals, smart materials and many other types of samples
- Join discussions involving regulatory aspects of ion analysis
- Network with people from research institutions, government bodies, manufacturers and all kinds of industries who are experts in developing and using ion chromatography and other ion analytical techniques to solve fundamental and real world problems in a timely and efficient manner
