

Press release

FRITSCH opens a subsidiary in the US

The FRITSCH Team at the opening

Besides branches in Singapore, Russia, China and France now FRITSCH opened its first subsidiary in the US: **Fritsch Milling and Sizing Inc.**

For a long time we have been serving customers in the USA but in order to meet the demands of our customers in a growing market it was time to have a FRITSCH branch directly in the US.

The new FRITSCH Headquarters USA is located in North Carolina and is part of the so called "Research Triangle" consisting of numerous research institutes, established companies as well as renowned universities. President FRITSCH USA Melissa Fauth considers this an ideal environment for FRITSCH.

The new FRITSCH Team has offices and a storage facility, but also an applications laboratory stocked with numerous FRITSCH instruments. Melissa Fauth and service technician Bradley Miller can introduce FRITSCH instruments here and if needed conduct tests and sample grindings for customers. The team is supported by Robert Fauth which is in charge of book keeping and Barry Schubmehl which represents the team in Oregon.

The US team along with sales manager Wolfgang Simon, managing director Robert Fritsch and Sebastian Fritsch participated in the Pittcon 2017 in Chicago. This is one of the leading trade fairs worldwide in the area of laboratory science, drawing visitors from over 90 countries annually. FRITSCH exhibited many instruments like for example the high-performance Planetary Mill **PULVERISETTE 6 premium line.**

You can find the whole FRITSCH range on sample preparation and particle sizing at www.fritsch-international.com.
