Titan Enterprises Releases Second Generation Pulsite® Link

As the newest addition

to its line of flow measuring instruments and displays, Titan Enterprises is releasing the second generation Pulsite® Link pulse and analogue converter. With the help of the Pulsite® Link, users may convert common pulse output flow metres, such Titan's [precision turbine flowmeters](#) and [positive displacement flowmeters](#), to scaled and linearised analogue and NPN/PNP outputs

Neil Hannay, Senior Development Engineer

with Titan Enterprises, says: “As part of Titan’s product portfolio development, once a new product has been out on the market for a time, we are able to gather data that facilitates our understanding about what the priority is for the customer, as well as identify potential improvements to product performance.” First launched in August 2022, Titan’s R&D team have incorporated a number of revisions to [the Pulsite® Link Mark 2](#), building on both the software performance and physical design of the flow measurement instrument.

Titan's proprietary [Interface Software](#),

in addition to allowing the user to configure and test the system via USB and a computer, now has greater capacity for data-logging, ideal for laboratory tests and applications. Increased inputs for calibration data can be entered in order to linearise the flowmeter signal for superior accuracy.

The pulse and analogue converter

has been redesigned to enable the USB stick to be inserted into the unit without needing to disassemble it. This allows for real-time monitoring and data-logging via a Windows PC.

The Pulsite® Link

is an ideal instrument to connect to customer devices for increased accuracy on mechanical flow devices, data monitoring, test rigs and control systems.

Titan Enterprises Ltd

Drawing upon over 40-years of flowmeter innovation - Titan Enterprises Ltd is a leading manufacturer of high-performance flow measurement solutions, including the Atrato® ultrasonic flowmeter, Oval Gear flowmeters, low flow Turbine flow meters and a flow instrument range.

Titan's company philosophy of "pushing the envelope by trying to do things a little different and better" has resulted in sales of over 2 million flowmeters and components into 50 countries worldwide and a repeat purchase percentage of 95%. All flow meters produced by Titan Enterprises are designed and manufactured to ISO9001 and calibrated to an uncertainty of $\pm 0.25\%$.

June 2023
