

## **New Regional Headquarters in Singapore: HIMA on course for expansion in Asia Pacific**

(Brühl, 23 May 2016)

**Safety specialist HIMA has chosen Singapore as its hub from which to coordinate activities in the region Asia Pacific. Setting up a new Regional Headquarters is an important element of the regional growth strategy.**

HIMA has worked with leading companies across Asia Pacific since the early 1990s to help them operate their plants safely. The safety specialist has offices in Perth, Brisbane, Kuala Lumpur, Seoul and Tokyo and works with a network of partners in other countries in the region. In response to soaring demand, HIMA now opens a new Regional Headquarters in Singapore.

“Singapore is the perfect location for coordinating activities in the region. From here we are well positioned to serve clients and develop new business in Korea, Japan, Australia, New Zealand and across Southeast Asia,” says Jeyan Nadarajah, HIMA’s Director Sales Asia Pacific.

The new name “HIMA Asia Pacific” reflects the safety specialist’s strategy to unify its brand around the world and deliver a consistent, high-quality customer experience. “Our goal is to build and maintain a strong global brand image that customers recognize and trust for leading-edge safety expertise, adds Steffen Philipp, Managing Partner of the HIMA Group.

One of HIMA’s most significant ongoing assignments in Asia Pacific is Ichthys, the massive Australian LNG project operated by INPEX. HIMA is supplying the project’s safety systems.

“Most day-to-day work with fellow project suppliers takes place in Singapore. That’s also where function tests have been conducted on more than 1,200 cabinets supplied by the basic process control system (BPCS) supplier, HIMA and project partners,” states Nadarajah. HIMA offices in Singapore, China (Shanghai), South Korea (Geoje), Australia (Perth), Dubai (UAE) and Germany (Bruehl) have collaborated closely on the project.

### **About HIMA**

The HIMA Group is the world's leading independent provider of solutions for safety-critical applications. With more than 35,000 installed systems and TÜV-certified hardware and software, HIMA qualifies as the safety automation industry’s technology leader. For over 45 years the world's largest oil, gas, chemical, pharmaceutical and energy-producing companies have relied on HIMA products, services and consulting to provide uninterrupted plant operations and protection for people and the environment. HIMA solutions are also leading the way to increased safety and profitability in the rail industry, logistics and machine operations. A family-owned safety specialist, HIMA operates from over 50 locations worldwide, has a workforce of approximately 850 employees and in fiscal year 2014 generated sales of €121 million.
